Every librarian needs one of these!

By Nancy Robinson Masters

I discovered this book while doing a Visiting Author presentation in a small school just last week. It's something every librarian can use! I plan to use this book as part of my Visiting Author presentations and am recommending it to all of the librarians I work with. Some of the information may be a bit above K-2, but it is one of the best teaching tools that connects books in a personal way to each reader that I've come across as an author myself in my 20 plus years of doing Visiting Author presentations. Thanks! Just wish I'd found it sooner!

Good book

By MDSSTL

I bought this to use in my library with kindergarteners for learning the parts of a book. I like the topic and presentation of the book (very appealing illustrations and appropriate comparisons of books and body parts) but found that some of the information in the main text is a little too advanced for kindergarteners. Will definitely continue to use it, but may skip some parts/pages for the little guys.

Five Stars

By Bonnie Ross

This is a great book to read and discuss with second grade students. Great for librarians.
