HOUSES ON THE EDGE BY ALEJANDRO BAHAMON PDF

To build a house -- a livable, workable, practical house -- in inhospitable environments is among the most ambitious projects an architect can undertake. Houses on the Edge features 28 homes from around the world built on mountainsides, cliff faces, and other such spaces -- ll of which combine remarkable site control with cutting edge architecture to create truly spectacular examples of residential architecture with exquisite views, exceptional privacy, and incredible technical and artistic achievement. Truly, these are among the world's most inspiring houses.

Interesting projects but seemingly overrated

By Adam Pfeifer

I like this book. It has a lot of good projects in it for reference, but there are several photos and drawings that have been scaled way past their acceptable viewing rates making the drawings/ photos pixelated and illegible. I also wish there was more description about some of the houses - the way they countered the slope of the site, to include structural/ foundation information. Beyond that, a good book for inspiration.
