Eehhh

By megan davis

It's ok. It does the math, it's just cheaply made. So if you are a college student like me and need something that'll do the job and save you some cash. This is it. Just don't be surprised when you can barely get the cover to slip on the way it's supposed to.

0 of 0 people found the following review helpful.

great

By SuperMomLuvsCamping

This came very fast and in perfect condition. Extremely interesting and necessary textbook for dissections.
